DETAILED ACTION

Allowable Subject Matter

1. Claims 1-24 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 13 and 24, the prior art fails to disclose or make obvious a method for locating a position of a feature in a scene comprising, in addition to the other recited steps of the claim, "cooperatively analyzing the output signals from at least two spatially adjacent array subelements to establish a data set reflective of an extent to which output signals responsive to the image of the feature are produced from exactly one or from more than one of the adjacent array subelements, and to reach a conclusion from the data set as to a location of the image of the feature on the segmented array with an accuracy of less than the linear dimension of an array subelement when the output signal is produced from more than one of the adjacent array subelements."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kaltschmidt (U.S. Patent No. 4,950,881) discloses a method and apparatus for tracking a missile.

Tullis (U.S. Patent No. 6,259,111 B1) discloses a system for tracking movement of an object.

Any comments considered necessary by applicant must be submitted no later

than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
